API

Our fully-documented API makes it easy to get started with visage|SDK and develop your own projects. Different APIs are available for different platforms, and they include the following main functionalities:

- Facial feature tracking
- Facial feature detection
- Face analysis
- Face recognition

The API Reference page* provides an overview of the APIs for different platforms, including links to the most important classes, and sample projects demonstrating particular functions.

> *Access to some areas of the documentation may be restricted and require a login. To view them, please contact your sales representative or fill out our contact form.
